## Definition

1) *Volatility Level:* represents the level of uncertainty and potential fluctuations in the value of Investment Fund Certificates. It reflects the possibility that the fund certificates may decrease or increase in value in the future due to various factors such as market fluctuations, the financial situation of invested companies, politics, and the economy. The Fund's investment portfolio is diversified to help spread risk and make the portfolio more stable during changing market conditions. Investors should carefully review information about investment funds and consider their own risk aversion to make appropriate investment decisions.
